

SBTi Sector Classification Descriptions

The following sector classification is mainly based on the Business Activity Groups classification developed by the [Global Reporting Initiative \(GRI\)](#), an independent, international organization that helps businesses and other organizations take responsibility for their impacts, by providing them with the global common language to communicate those impacts. A new [Sector Standards Program](#) is being undertaken by the GRI thus, the Business Activity Groups document is now outdated. The content of the original document has served as the base and main reference for the present classification. The rights for the utilization and distribution of this document have been granted to the Science Based Targets initiative (SBTi) to continue its efforts to promote corporate action aligned with climate science across the globe.
